

# BREAK WIFE 3.0

# Info

\*\* Loop number: 1 is the "Master Loop". (The master clock syncs loops 2 - 8 to the length of loop 1)

The screenshot shows the BREAK WIFE 3.0 software interface. On the left, there are eight 'drop' buttons numbered 1 to 8, each with a sample name like 'WFE Guf-1.aif'. The main area is divided into several sections: a 'drop loops' section, an 'auto swap loop SEQ' section with a bar chart, a 'Sample Display' section with a waveform, a 'Seq Slices' section with a grid, and a 'Randomize Slices' section. Below these are various control knobs and buttons for 'SCRUB', 'sync GATE', 'AUTO pan', 'tape STOP', 'reverse', 'cutoff', 'del mix', 'auto-speed-Off', 'auto-pitch-On', and 'level'. At the bottom, there are 'Save' and 'Load' buttons, a 'morph' box, and a 'Beatwife 2012' logo.
